

Chief Mechanics

Green Innovation meets performance

Our Project

Formula Electric Belgium is a team of engineering students who build a **Formula-Student racecar** to compete in international competitions. We design and build a brand-new car every year and compete with other teams in multiple worldwide competitions during the summer months. Formula Student is by far the biggest **engineering competition** in the world and continues to grow. From next year on, we will be competing in both the **electrical** and **driverless** competition. You can join the project during one or two years by applying for the **'Postgraduate in Innovation and Entrepreneurship in Engineering'**.

Tasks

As Chief Engineer you carry the final responsibility of the production of the entire car. You make the car assembly while paying attention to the coherence of all components. In the end all components should fit together and be rule compliant. In order to ensure this you need to keep an overview between the different departments.

Next to this, you are responsible for assigning millers and ordering materials. You make a production plan and ensure that the team respects it. You are part of the management of the team and assist in taking important decisions.

Profile

- Strong communication skills
- Technical insight
- Good at planning
- Organised
- Basic assembly knowledge in CAD

Returns

- A unique engineering experience
- Work with the newest technologies and innovative companies
- A summer season packed with competitions all over Europe
- Boosting your soft skills (Public speaking, maintaining professional relationships, ...)
- Work in a team with well over 120 partners
- An experience of a life-time!
