

CHIEF MECHANICS MANAGEMENT

Green Innovation meets performance

Our Project

Formula Electric Belgium is a student-based race team that pushes green innovation to performance. We design and build our own electric race car each year to participate in the international Formula Student competitions. This year, we are looking for pioneers to challenge the status quo and bring our top-notch electric race car to the next level. As a postgraduate student, you will research, design, test your systems together with a group of highly motivated, ambitious students. You will work together with your team members and numerous companies to develop new innovations.

Function

As Chief Engineer you carry the final responsibility of the production of the entire car. You make the car assembly while paying attention to the coherence of all components. In the end all components should fit together and be rule compliant. In order to ensure this you need to keep an overview between the different departments.

Next to this, you are responsible for assigning millers and ordering materials. You make a production plan and ensure that the team respects it. You are part of the management of the team and assist in taking important decisions.

Profile

- Bachelor/Master Engineering Science, Engineering Technology or Business Engineering
- Strong communicative skills
- Well-organized and intrinsic motivation
- Experience with CAD Design
- Creative out-of-the box thinker

Returns

- Experience in a unique field of expertise
- Gain exposure to cutting-edge technologies and industry-leading organizations
- Possibility to network and cooperate with international stakeholders
- A summer packed with international racing competitions!

Up for the challenge?
