

Green Innovation meets performance

Our Project

Formula Electric Belgium is a student-based race team that pushes green innovation to performance. We design and build our own electric race car each year to participate in the international Formula Student competitions. This year, we are looking for pioneers to challenge the status quo and bring our topnotch electric race car to the next level. As a postgraduate student, you will research, design, test your systems together with a group of highly motivated, ambitious students. You will work together with your team members and numerous companies to develop new innovations.

Function

A team manager, leads, monitors and supervises the team members to achieve the desired end goals. It is your role to motivate and inspire the team by creating an environment that promotes positive communication, encourages bonding of team members, and demonstrates flexibility. You will therefore also be the communication channel between the team, the university and the coaches and communication with several strategic partners.

Specific functions are, but not limited to, **organizing** team meetings to get the team updated, having the responsibility over the **financial planning** and solving challenges that arise each day. These challenges will be overcome by the cooperation of the team. Last but not least, legal and organizational documents will pass by you for approval and will then be discussed with team coaches.

Profile

- Bachelor/Master Engineering Science, Engineering Technology or Business Engineering
- Strong communicative skills
- Well-organized and intrinsic motivation
- Knowledge of financial systems
- Creative out-of-the box thinker

Returns

- Experience in an unique field of expertise
- Gain exposure to cutting-edge technologies and industry-leading organizations
- Possibility to network and cooperate with international stakeholders
- A summer packed with international racing competitions!

Up for the challenge?
