

# Composites

## Head of Composites

**Green innovation meets performance**

## Our Project

Formula Electric Belgium is a student-based race team that pushes green innovation to performance. We design and build our own electric race car each year to participate in international Formula Student competitions. We are looking for pioneers to challenge the status quo and bring our top-notch electric race car to the next level. As a postgraduate student, you will research, design, and test your systems together with a group of highly motivated students. You will innovate together with your team members and numerous companies to develop our next generation formula student race car.

## Function

As **Head of Composites**, you will act as the **key link between the Aerodynamics and Chassis department**. These two departments share many commonalities, making it essential to have someone who oversees their seamless collaboration. You will ensure **smooth and effective communication** between both departments at all times.

Furthermore, you will be responsible for tasks such as drafting the **production schedule** for both departments, managing **budget** planning, and coordinating **orders** with various sponsors, among other duties.

Additionally, you will **assist with technical tasks within the departments**, ranging from supporting the production process to designing various components.

## Up for the challenge?
